6 Fantastic Products for Air Travel

#4. The Air Repair Kit:

I admit that I was a skin care snob. For years I spent hundreds of dollars on my skin care regimen. But one early morning, I was leaving for a flight and I did not have any clean 3-ounce containers to stash my expensive skincare products in. Then, I remembered that I was given the **Air Repair Kit** as a gift and left it on my shelf for weeks. I thought, "Really, what skin care products could be any good if they only

cost \$34.95?" Out of desperation I took the kit on my trip and I have never looked back. These products really work and they comes in a TSA approved bag that you can clip on the outside of your carry on! My favorite is the **Rescue Balm**, which is a thick salve that feels great on the lips. Now, I use **Air Repair** daily and not just when I am flying.
